We Deliver Solutions!

Golf Course Sand

L. G. Everist is your local source for United States Golf Association-specified root zone, topdressing, and bunker sand.

Our golf course sand is light gray in color and is washed numerous times in our classifier to maintain its consistency. We produce a high quality sand that maintains beautiful greens and highly playable bunkers.

We also custom-blend for root zone construction projects. We will work with your course professionals to develop specialized products to meet your needs.

Key Specifications/Information:

- Color - light gray (dry) to dark gray (wet)
 - Shape - Sub-angular to rounded
 - Non-Crusting and slight set-up
 - Penetrometer value - 2.6 kg/cm² - low tendency to bury the ball.
 - Infiltration Rate - 23.8"/hr - min. of 20 for well drained bunkers
- Full specs available upon request.*

Cart Path Stone

Sioux Quartzite and Mahogany Granite are easy-to-install natural stone solutions for high-traffic cart paths, cart parking areas, and patios.

This 3/8" down product has the ability to pack tightly for stability and maintains its integrity through high-traffic and freeze-thaw cycles.

Simply spread the stones and pack them in place. It can be easily reworked as needed. Gone are the days of throwing stones with your mower and damaging mower blades.

L. G. Everist can also provide a complete line of golf course signage, including tee box signs, tee spot markers, sponsor benches, and entrance signs.
