Monuments

Creating a memorial or monument for your loved one is a lasting tribute that will stand the test of time.

L.G. Everist creates monuments with enduring elegance. Our monuments are made from Quartzite, one of the world's most beautiful and durable stones. Perfectly formed "moons" occasionally appear in the stone. Legend has it that these moons are spots where spirits have touched the stone and left their mark; thus, each piece is unique and has nature's own fingerprint.

Our stone experts will work with you to handcraft a custom monument.

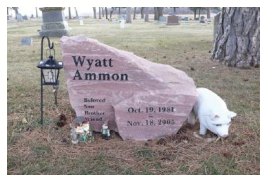

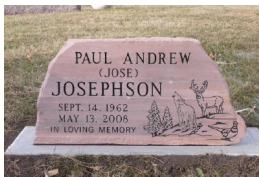

Uprights: This monument is ideal for companion settings, but can be made into an individual setting. Monument bases give the piece a finished look.

Naturals: Rustic and natural, this monument stands out in a special way. Each piece is made with random cuts to create a one-of-a-kind appearance. This monument can be made as a companion or individual stone.

Bevels: Our bevel markers are similar to a traditional grass marker with a slight slant. This marker can be made as an individual or companion piece.

Grass: Jasper grass markers are the most traditional shapes as they are low profile and lay flat and close to the ground. Grass markers can be made in individual or companion sizes and in a number of different finishes.

**Let us help create a beautiful tribute to your loved ones.
