# Signage Stones

When you say it in stone, you say it forever.

The most unique and diverse of the L.G. Everist landscaping line, our engraved signage stone, can be custom cut and engraved for any application. Create a signage stone that is as unique and special as your home or business. The options are endless. Engraved signage stones are great ways to welcome your customers and visitors or enhance a park or golf course setting.

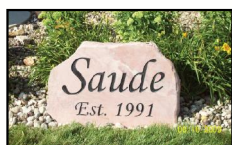

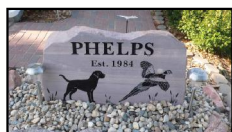

L.G. Everist is your source for the most unique and durable landscaping products on the market. Our landscape materials are made from Quartzite, one of the world's most beautiful and durable stones. Quartzite in the Sioux Falls area is typically a dusty rose or mauve color but can vary in color from light pink to deep purple depending on the quarry's depth and location. Each stone has its own unique color and grain structure, and perfectly formed "moons" occasionally appear on the stone. Legend has it that these "moons" are spots where spirits have touched the stone and left their mark, thus each piece is unique and has nature's own "fingerprint". Each project is handled as its own custom job, so your unique character shines through in each project. An engraved stone is the perfect addition to your next landscaping project!

Engrave a quartzite stone sign for:

- **Cities • Parks • Industrial Parks • Ball Fields • Residential • Businesses • Golf Courses**
- **Churches • Schools • Memorials**

### Residential

### Commercial

### Religious

### School

### Community
